

Solventborne

Product name
ACRYDIC A-9521

Description

ACRYDIC A-9521 is a solventborne moisture curing silicone acrylic resin to use in combination with epoxy silane hardeners for 2K coatings. ACRYDIC A-9521 has excellent adhesion to plastics, metals and glass. It is recommended for wood and plastic coatings.

Applications

Wood coatings.
Plastics coatings.

Key features

Adhesion to plastics, metals and glass substrates.

Characteristics

	ACRYDIC A-9521
Appearance	Clear liquid
Solids content, weight %	49.0 - 51.0
Viscosity, Gardner 25°C	U - (X-Y)
Color, Gardner	4 max.
Acid value on solution, mgKOH/g	3 max.
Solvent	Toluene / Butyl acetate

Storage

Store in a cool, dry, well-ventilated place at temperatures below 25°C.

Safe handling note

Refer to SDS for ACRYDIC A-9521.

Please confirm with our sales representative regarding chemical regulatory status of intended countries.
