

TECHNICAL INFORMATION

Very thin double coated adhesive tape

DIC TN10AIR

Construction

Remark) Outer side: bonding for graphite sheet. Inner/core side: bonding for adherend.

Characteristic

- *Very thin! Tape thickness is 10 µm.*
- *Good die-cutting.* • *Good workability.*
- *Good air releasing property*

Application

- *For attaching thin sheet for mobile electronic equipment.*
- *For attaching graphite sheet.*
- *For attaching magnetic sheet.*

Property

	Units	TN10AIR
<i>Tape thickness</i>	µm	10
<i>Adhesion (SUS) – Outer side : Flat side</i>	N/20mm	3.0
<i>Adhesion (SUS) – Inner side : Emboss side</i>	N/20mm	5.0
<i>Air releasing property</i>	—	<i>Excellent</i>

※Please consult with sales staff about tape size.
