

Air-releasing double coated adhesive tape

DIC TN20AIR

Construction

Remark) Out side: bonding for graphite sheet. Inner/core side: bonding for adherend.

Characteristic

- Tape thickness is 20 µm.
- Good die-cutting. •Good workability.
- Good air releasing property.

Application

- For attaching thin sheet for mobile electronic equipment.
- For attaching graphite sheet.
- For attaching magnetic sheet.

Property

	Units	TN20AIR
Tape thickness	µm	20
Adhesion (SUS) *Out side	N/20mm	4.0
Adhesion (SUS) *Inner/core side	N/20mm	5.0
Air releasing property	—	Excellent

* Please consult with sales staff about tape size.
