DIC Corporation

DIC Changes Trade Names for Certain Polymers Products

—Changes designed to accelerate global business expansion—

Tokyo, Japan—DIC Corporation announced today that it will change the trade names of certain UV-curable and epoxy resins for applications including coatings and resist inks, in line with its global polymers branding strategy, which aims to accelerate business expansion worldwide. Details of these changes, which will go into effect on January 7, 2019, are outlined below.

1. Trade names

Product	Current trade name	New trade name	Application
UV-curable resins	UNIDIC	LUXYDIR	Coatings
Epoxy resins	UNIDIC	EPICLON	Resist inks
	DICLITE	EPICLON	General

2. Date new trade names will go into effect:

January 7, 2019

3. Related matters

- These changes to trade names will not entail any changes to our production sites, production equipment, quality standards, containers or container sizes.
- Product labels, catalogs and other such materials will be updated as necessary to reflect new trade names. However, customers are advised that previous trade names may still appear in some documents and materials.
